Professional Profile

Full-stack developer with 8+ years of experience building and maintaining web applications for teams in the public sector, banking, higher education, and SaaS/R&D. Works mainly with Java/Spring, TypeScript, Angular/React, relational databases, and integrations between business systems. Recent work focuses on Java/Spring microservices, Kafka/Protobuf messaging, secure REST APIs, Oracle DB, Camunda workflow automation, and SAP S/4HANA OData integrations. Uses LLM-based development tools for implementation plans, repository instructions, context notes, agent prompts, test, code review, debugging, and documentation. Previous R&D experience building AI-enabled apps with GPT models, LangChain, and vector databases. Focused on maintainable code, security, performance, and user experience.

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL, Shell Script, Kotlin, Swift

Back End: Spring Boot, Java/Jersey, REST APIs, Kafka, Protobuf, Node.js, Next.js, Laravel, Ruby on Rails

Front End: Angular, React, HTML5, CSS/SASS, Tailwind CSS, Material Design, mobile interfaces, Adobe XD, Photoshop

Data: Oracle DB, PostgreSQL, SQL Server, MySQL, Sybase DB, NoSQL, Pinecone/vector databases

Cloud & DevOps: Docker, Kubernetes, Jenkins, JBoss, Google Cloud Platform, IBM Cloud, Red Hat OpenShift, Git

Quality & Tools: JUnit, Mockito, Selenium, Protractor, SonarQube, Fortify, Firebase Crashlytics, Google Analytics, Jira, JFrog Artifactory

Workflow & Integration: Camunda, JasperReports, SAP S/4HANA OData, Kafka/Protobuf, enterprise system integrations

AI-Assisted Development: Claude Code, Codex, GitHub Copilot, repository instructions, AGENTS.md/context files, agent skills, prompt/context management

AI/R&D: OpenAI GPT models, LLaMA, LangChain, vector databases, prompt benchmarking, LangChain Auto-Evaluator

Spoken Languages: Portuguese native; English C2

Professional Experience

European Commission (contract)

Remote, Europe

Full-Stack Developer

Mar. 2025 – Apr. 2026

- Built and maintained Java/Spring microservices for system integrations using Kafka/Protobuf messaging, secured REST APIs, Oracle DB, and SAP S/4HANA OData services.
- Maintained Camunda-based workflow automation and translated business-process requirements into integration logic in a SaaS delivery environment.
- Applied an AI-assisted, agentic development workflow within project security constraints, using GitHub Copilot/LLM coding assistants for task breakdown, implementation planning, test scaffolding, code review, debugging, and documentation.
- Managed development context through repository instructions, AGENTS.md files, reusable agents/skills, validation steps, and concise prompts for microservice, Kafka, SAP, and Camunda changes.

KLx - Crédit Agricole Group (contract)

Lisbon, Portugal

Full-Stack Developer

Oct. 2024 – Mar. 2025

- Maintained enterprise banking applications using Angular, Spring Boot, and PostgreSQL.
- Assisted development of Spring Batch pipelines for enterprise data and process automation.
- Collaborated with cross-functional Agile teams on delivery, issue resolution, and maintainability improvements.

Fujitsu (contract)

Lisbon, Portugal

Full-Stack Developer

Jan. 2024 – Sep. 2024

- Maintained enterprise projects in a Spring Boot microservice environment using Apache Kafka, Angular, and PostgreSQL.
- Developed internal production-monitoring applications with React, Node.js clusters, and NoSQL databases, including dashboards for operational metrics.
- Participated in sprint planning, daily coordination, retrospectives, and cross-functional troubleshooting.

SMARKIO (full-time)

Remote, Portugal

Software Engineer

Mar. 2023 – Jul. 2023

- Collaborated with the R&D team on generative AI and large language model use cases.
- Built multiple proof-of-concept web applications using React, Next.js, and Tailwind CSS.
- Integrated OpenAI GPT models, LLaMA, LangChain, and vector databases; set up prompt-performance benchmarks with LangChain Auto-Evaluator.

BNP Paribas (contract)

Lisbon, Portugal

Full-Stack Developer

Mar. 2022 – Mar. 2023

- Developed and maintained complex web applications using Spring Boot, REST APIs, ExtJS, Angular, and Sybase DB.
- Coordinated requirements with distributed SaaS teams, maintained Jira backlogs, and supported production deployments.
- Built and maintained JasperReports; managed packages in JFrog Artifactory for version control and dependency access.
- Troubleshot issues across a large microservice codebase; wrote JUnit/Mockito unit and integration tests; used SonarQube and Fortify for quality and security analysis.

Senac (full-time)

Full-Stack Developer

São Paulo, Brazil

Mar. 2018 – Feb. 2022

- Delivered internal web applications with Angular/Material Design front ends and Java/Jersey REST APIs connected to Oracle DB.
- Designed relational database models and wrote SQL queries to support business processes and improve data retrieval.
- Assisted Jenkins CI/CD setup, wrote Angular E2E tests with Protractor/Selenium, and participated in Agile ceremonies.
- Mentored interns in Angular, RxJS, Java, and project best practices.

Earlier Experience

YetGo (part-time)

Belém, Brazil ▪ Apr. 2017 – Feb. 2018

Software Developer

- Maintained a PHP/Laravel/MySQL customer dashboard, coded back-end integration tests, built iOS interfaces with AutoLayout, Objective-C, and Swift, and integrated Firebase Crashlytics for issue monitoring.

Jambu Tecnologia (part-time)

Belém, Brazil ▪ Mar. 2017 – Feb. 2018

Web Developer

- Developed a Ruby on Rails CMS for a government agency and an SEO-optimized product catalog for small businesses using Bootstrap and PostgreSQL.

Portal da Floresta Empreendimentos (contract)

Belém, Brazil ▪ Dec. 2014 – Jan. 2017

Lead Software Developer

- Led Laravel/MySQL administrative systems for real-estate financing, including sales, payments, default control, reporting, contract issuance, and finance/accounting data workflows.

Banco do Brasil (intern)

Belém, Brazil ▪ May 2013 – Feb. 2014

Data Analyst Intern

- Built Access/Excel VBA scripts to collect and automate internal MS-DOS application workflows; delivered Excel mini-lectures and supported technology training.

MedicalDTV (freelancer)

Panama City, United States ▪ Sep. 2012 – Mar. 2013

Lead Software Developer

- Rebuilt an e-commerce website for recorded medical congress presentations using PHP/MySQL and Zend Framework; integrated PayPal, ffmpeg encoding scripts, hosting, domains, and email administration.

GERCOM - Research Group on Computer Networks and Multimedia Communication, Federal University of Pará (intern)

Belém, Brazil ▪ Aug. 2010 – Jul. 2012

Research Collaborator

- Contributed to Sensor4Cities, a wireless sensor network data-collection tool for environmental conditions, and collaborated on a technical paper about the project.

Jambu Tecnologia / CTIC - Federal University of Pará (intern)

Belém, Brazil ▪ Nov. 2010 – Nov. 2011

Web Developer Intern

- Developed and maintained PHP/HTML/Joomla/WordPress websites, published updates with FTP/PHPMyAdmin, and supported open-source CRM/ERP applications.

Education

Senac University Center

São Paulo, Brazil

Computer Science coursework; 60 credits completed

2018 – 2020

Selected coursework: object-oriented programming, databases, usability and human-computer interfaces, scientific computing, data extraction and visualization, communication and technical writing, digital law.

UFPA - Federal University of Pará

Belém, Brazil

Computer Engineering coursework; 76 credits completed

2010 – 2014

Selected coursework: programming, data structures, computer architecture, computer networks, operating systems, software engineering, probability and statistics, theory of computation, microprocessors and microcontrollers.

Certifications and Additional Activities

- ESOL Certification, Tom P. Haney Technical Center, United States, 2013.
- ENEEAmb 2012, National Meeting of Environmental Engineering Students - developed WordPress site, registration/payment workflow, course/technical-visit selection, and certificate-generation script.
- Telecentros.BR - remote student instructor for a government-backed digital inclusion program, supporting technology access and reporting program metrics.
